Subject: Dioxane-TCE Wells Forensic Study.docx
Attachments: Dioxane-TCE Wells Forensic Study.docx

All – attached is a list of wells that are proposed to be sampled for this round of sampling. It is expected that a number of additional wells will be sampled at a later date. The first 4 are what I believe that we agreed to on the call on Tuesday. The last two were suggested by MWD as a replacement for the recovery well that was initially proposed. Note that well 53D2 well is out of service and is not available. All wells will be sampled for TCE, TCA and 1,4 DCE. CSIA analysis will be performed for TCE and 1,4 Dioxane as indicated. Please let me know if anyone disagrees with the wells.

The tentative schedule is to begin sampling on Thursday Feb 18. I will have discussions with the well owners (Navy or Grumman) relative to specific scheduling. Thanks Jim H
